I have no issues with you providing a foundational CGP presentation. Please remind participants that when finalized, the 2017 CGP will replace the current 2012 CGP (which expires on 2/17/2017).

Thanks, Nelly. I understand that the permits aren't finalized yet, but I think we can go through broad concepts that shouldn't be changing based on comments/certification, like the six minimum measures and the guidance for complying with them. We can go through broad foundational concepts of the CGP/MSGP – the one request I have received so far is to go over SWPPP requirements. We wouldn't have enough time to get into too much detail on those permits. But many of these SMS4s haven't had much interaction with either EPA or NMED, and it would be good to give them guidance on these topics.

We definitely want to include cooperative agreement discussions in the workshop, but I'm not sure that would be enough material to fill the entire day. I'm thinking that we would devote the entire afternoon to that discussion.

Sarah

Please clarify if the proposed workshop will include technical aspects of the municipal stormwater program.

We are not ready to discuss the technical portion of the proposed small MS4 permit with the permittees. We are still revising the permit to address comments received from the public, ESA, and the State 401 certification letter, including concerns from DOT on the 401 certification letter.

I thought the purpose of the workshop was to bring the partnering aspect of the MS4 permit (e.g., MOAs to establish cooperative programs, etc.).

I am not sure if we are ready to discuss CGP either.

Thanks again!

Subject: Save the Date - SMS4 Technical Workshop in Albuquerque July 14th

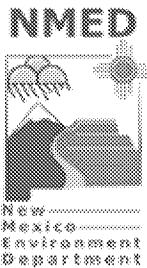

Good morning, all!

Please save the date of July 14th, from 9am to 4pm, for an EPA-sponsored SMS4 Technical Workshop in Albuquerque at the NMED District 1 Office – Rio Grande Conference Room (121 Tijeras Ave., NE, Albuquerque, NM 87102).

The draft agenda is being developed, so if you have suggestions for items you want addressed, please let me know ASAP – this workshop is for you, and I want to ensure it is as useful as possible. At this point, we'll have an overview of permit requirements to start off the day (for example, IDDE or CGP oversight). I did receive a request to discuss CGP and MSGP SWPPP requirements, so that will be on the agenda as well.

One hands-on idea we had for the agenda is that since cooperative agreements are a significant benefit in this permit, we would also like to have each Urbanized Area focus on a cooperative element and bring that proposal for discussion at the meeting. If you think this would be beneficial, please let me know.

We will be sending out a registration link in the near future, so please be on the lookout for that. If you have any questions, please let me or Adele Cardenas (EPA) know. Thank you!

Sarah Holcomb
